Biography

Ordan Duncan Is A Results-Driven Front-End Developer, UI/UX Designer, And AI-Focused Software Builder With A Strong Focus On Creating Scalable Digital Solutions That Drive Business Growth. His Expertise Spans Web And App Development, User-Centered Design, AI Workflow Engineering, And Content Creation, Enabling Businesses To Generate Leads, Enhance User Experiences, And Optimize Their Digital Presence.

He Combines Strong Technical Ability With An Execution-Focused Mindset, Building High-Performing Digital Products And Systems Designed To Scale Revenue And Deliver Measurable Results.

With A Clear Understanding Of Both Design And Development, Jordan Bridges The Gap Between Functionality And User Experience To Create Impactful Solutions.

Known For His Adaptability And Forward-Thinking Approach, He Continuously Explores Innovative Ways To Integrate AI And Automation Into Modern Business Environments.

Education

Vega
2023-2025 | Pretoria

i studied ui/ux design, focusing on user-centered design, prototyping, and creating intuitive digital experiences.

CBC - High School
2018-2022 | Boksburg

completed high school with a strong foundation in discipline, teamwork, and communication.

Experience

EPSza | UI/UX Designer
Jan 2026 - **Present**

i'm currently working as a ux ui design intern in a fast paced agency, helping design user centered digital experiences for different clients. i'm involved in the design process from research and ideas through to wireframes, interface design, and prototyping. i work with designers, developers, and project managers to turn user needs and business goals into clear and effective solutions. i also build ai driven workflows and think through system architecture, focusing on how products connect and deliver value, including how users interact with ai features. i also work with front end development to bring designs to life and ensure a smooth transition into development. i take part in feedback sessions and design reviews, helping me improve my design thinking and problem solving.

CodeCabin_ | UI Designer
Dec 2022 - Jul 2025 **(3 Years)**

in this role i worked across multiple digital marketing campaigns, collaborating with influencers to grow brand awareness and engagement. i was responsible for creating campaign concepts, writing copy, and producing content that aligned with each brand's identity. my work included ui design for digital experiences, visual direction, and creating polished digital illustrations. i contributed to end-to-end campaign execution, from ideation to final delivery, ensuring every asset was consistent, impactful, and strategically aligned with campaign goals.

Freelance Ui since 2020

Skills:

Design

- UI/UX Design
- User-Centered Design
- Wireframing
- Prototyping
- User Research
- Interaction Design
- Visual Design
- Responsive Design
- Usability Testing

Software

- Front-End Development
- Web Application Development
- Responsive Web Development
- API Integration
- Performance Optimization
- Debugging & Problem Solving
- Version Control Practices
- Clean Code & Code Structure

AI

- AI Workflow Development
- Prompt Engineering
- Process Automation
- AI Integration into Applications
- Chatbot Logic & Design
- Problem Solving with AI Systems
